

Sovereign Digital Makes History

By being the first Virginia state registered RIA to manage crypto

Viena, VA, Apr 25, 2022/ PR Web. **Sovereign Wealth Management** is proud to announce that it has been authorized by Virginia's financial regulator (Virginia SCC) to become the state's first Registered Investment Advisor (RIA) permitted to manage cryptocurrency portfolios. The Cryptocurrency management will take place under the brand **Sovereign Digital**.

We are pleased to make history and be in the vanguard of financial consultancy in our home state of Virginia and elsewhere. While crypto is the newest and fastest-growing investment market, bringing noticeable gains to various investors, it has particular risks and challenges that have to be properly understood.

For this reason, our strategy is structured to be Progressive, Protective, and Proactive, which means to help clients achieve ambitious financial goals and mitigate any potential risks that may follow.

Client assets are held at a strictly regulated digital asset custodian, Gemini. Our core investment holdings are blue chip digital assets in the crypto space, in sectors including Store of Value – the most established of which is Bitcoin, General Purpose Smart Contracts – the best known of these is Ethereum, as well as Blockchain Oracles – the leader among which is Chainlink, and Defi – a leading example of which is Uniswap.
