

A vibrant, futuristic cityscape at night, viewed from a low angle looking up. The scene is filled with neon lights in various colors (blue, pink, green, yellow) and glowing signs. A person in a red dress is seen from behind, walking on a pinkish-red path. The overall atmosphere is cyberpunk and digital.

# NEIGHBOR

metaverse studios

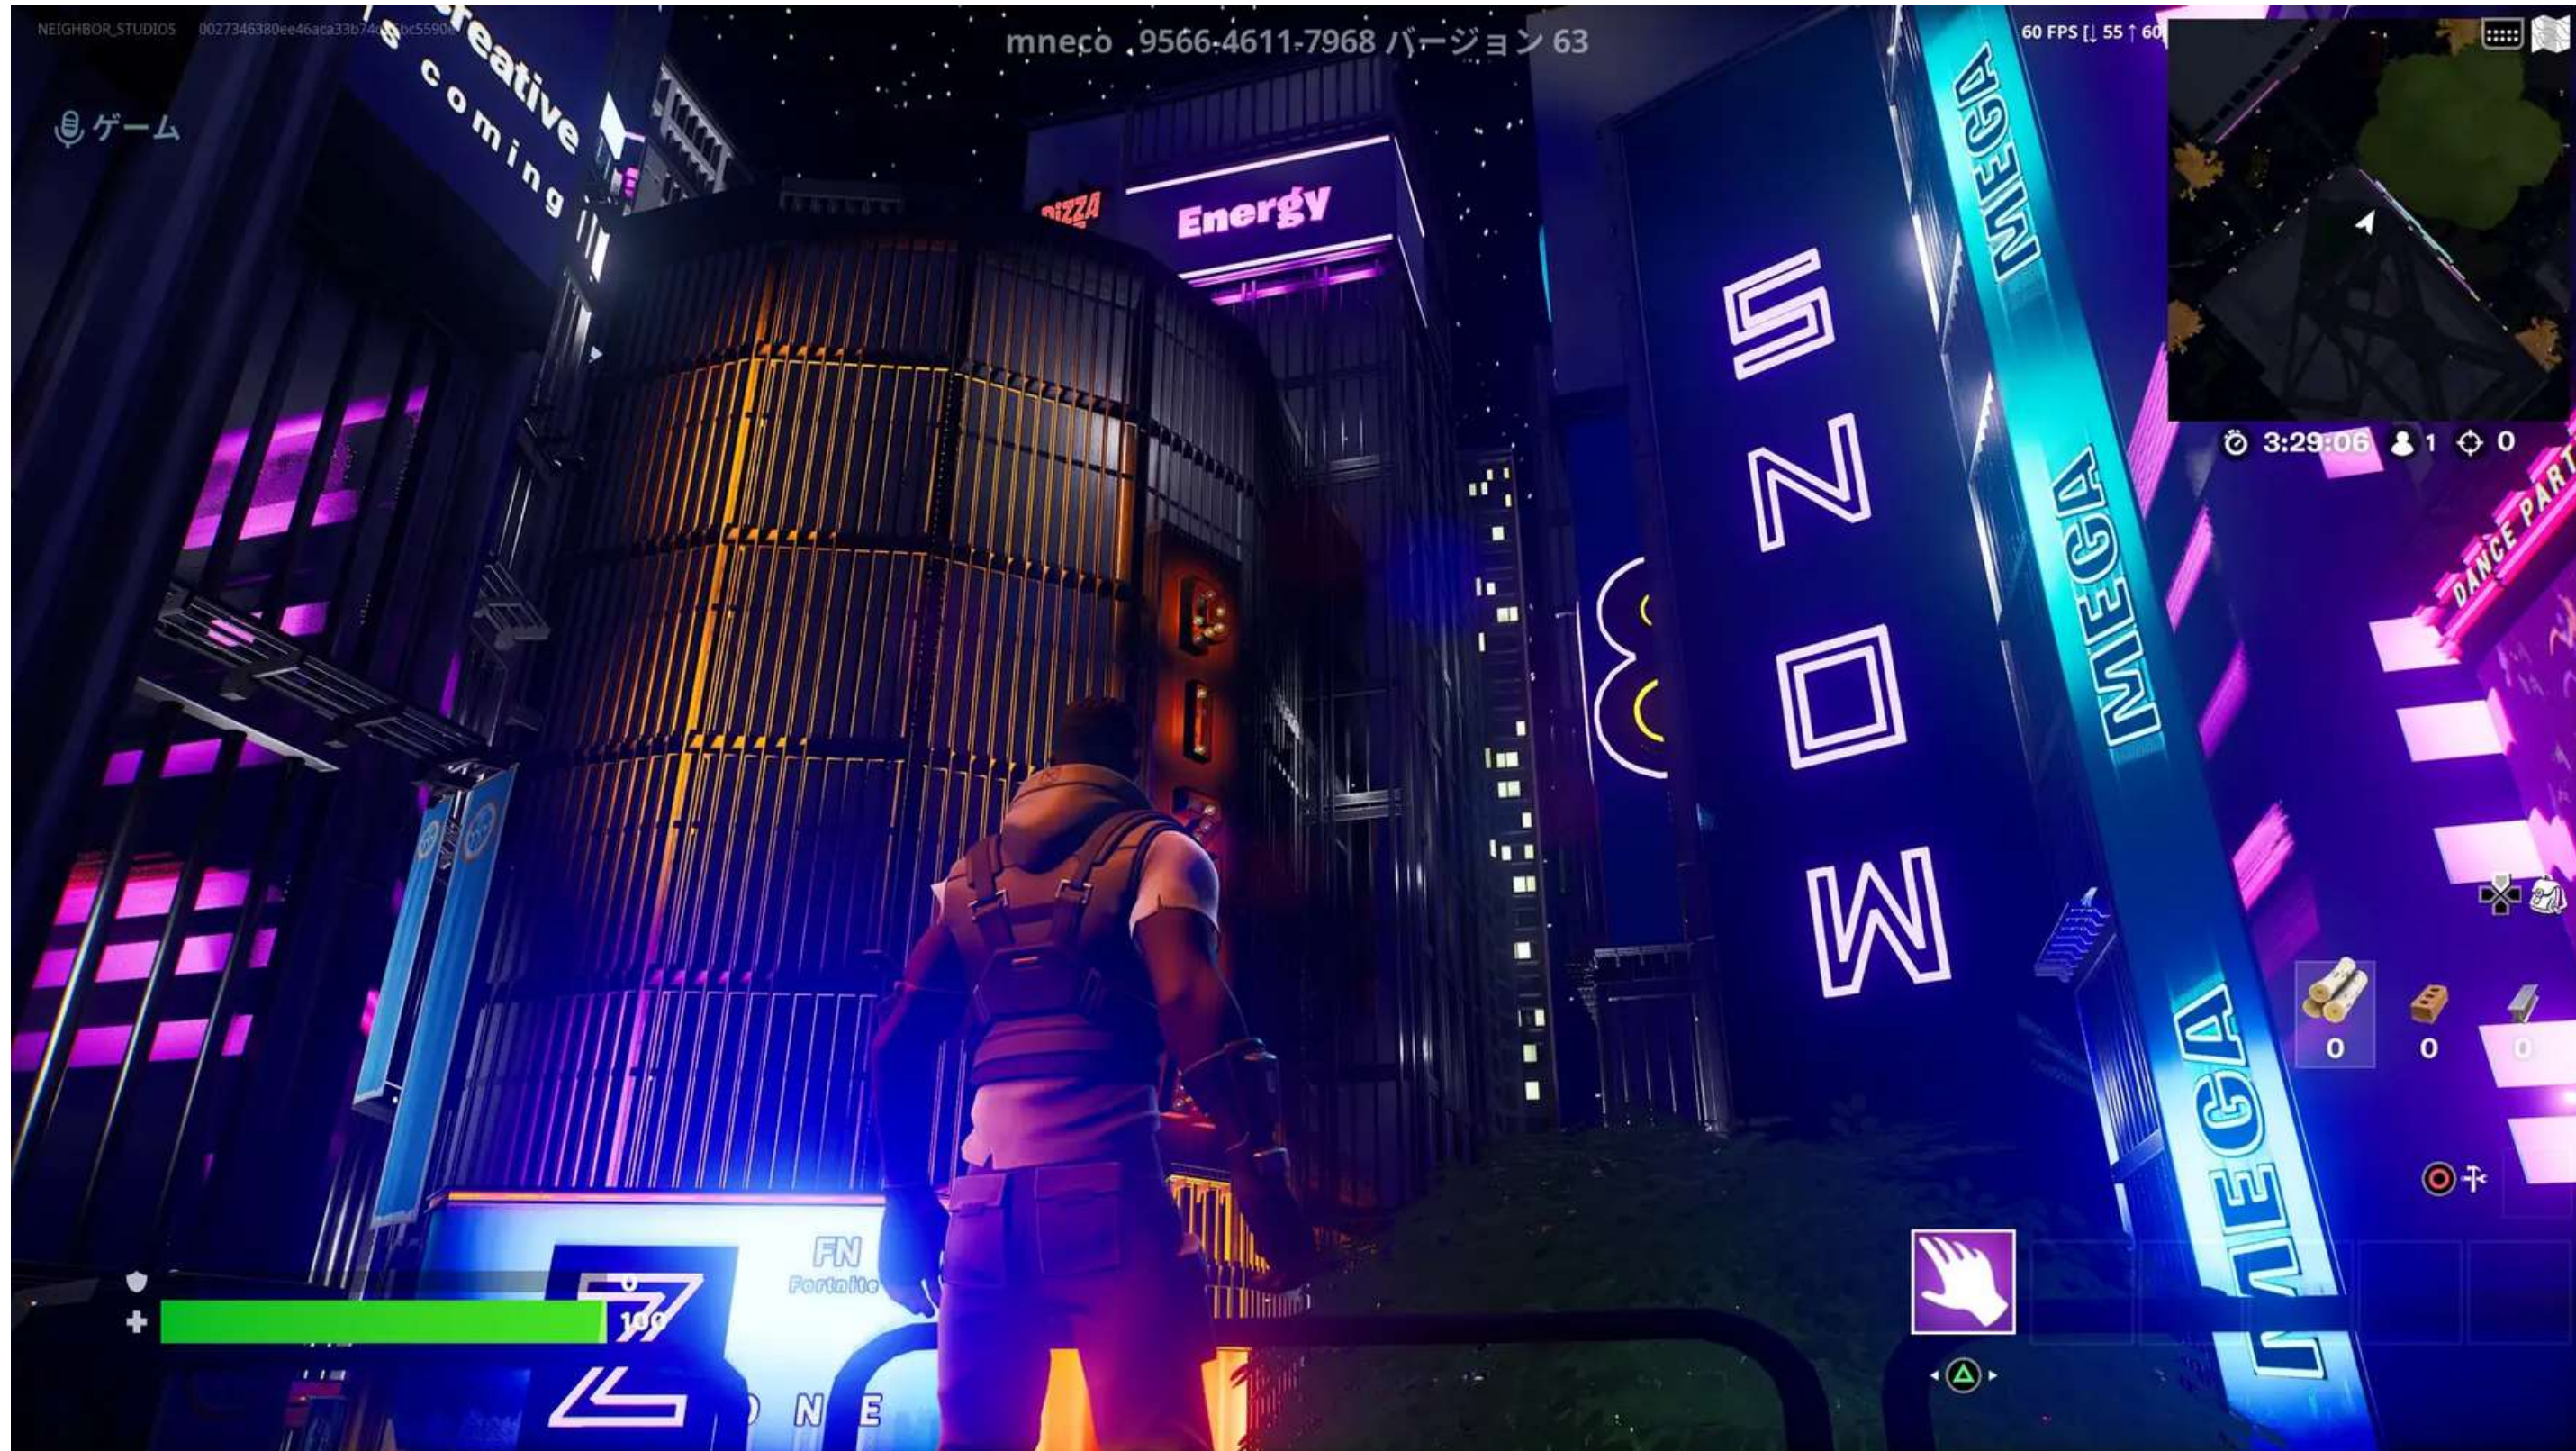

## ■ Reproduction of cities and tourist spots

Reproduce the actual city in the Metaverse space. You can also hold events and enjoy games in the city.

■ Fictitious cities, spaces, and buildings

We will create cities and buildings that do not exist from scratch. We will listen to the concept of the company or service and create it or create it with the creator's own world view.

This is a fictional castle.

## ■ Game production

You can create a wide range of games such as action games, tag games, parkour, puzzle-solving games, and racing games. We also produce games using the above towns and buildings.
