Construction Contractor Lifts Jobsite Productivity to New Levels with SkyPodz

Built for high-rise construction projects, SkyPodz provide site managers and tradesmen a crane hoisted mobile office and storage structure to increase productivity and efficiency on the jobsite.

High-rise construction projects in urban areas often have limited site storage and office workspaces far away from active work. Temporary offices are usually rented or built on-site but are rarely on the same floor where the work is taking place. With over 40 years of experience in the construction industry, Michael "Mike" Hardin, president of SkyPodz, developed SkyPodz to increase the productivity of any high-rise construction project allowing site managers and superintendents to remain closer to their work.

A SkyPod is a lightweight, temporary office structure capable of being hoisted by a crane and mounted to any floor during construction. Providing an enclosed office, storage, and power source for any trade, a SkyPod saves the effort and labor hours of employees traveling to and from the mobile office on the ground.

"We wanted to create a place for superintendents to be close to their work, a quiet place to make telephone calls, use a computer, pull-up drawings, and recharge power tools," says Hardin.

Made from a lightweight aluminum 20-ft. modified container, a SkyPod is mounted to an underslung steel beam assembly with outrigger beams that protrude inside the building. These outrigger beams are then temporarily secured to the floor. When ready, it can be detached and jumped to higher floors as construction progresses on the high-rise. The layout configuration can be adjusted based on needs and wants.

Amenities Include:

- Operating lights

- HVAC climate control
- Mounted computer monitors
- Shelving, a desk, plan/drawing racks, and tables
- Filing cabinet
- Refrigerator and microwave unit
- Circuit breakers for temporary power connections
- Charging station for tools
- Storage area with rollup door for larger tools
- Large signage area to display a company logo

“We’re bringing productivity enhancements to new levels,” says Hardin. “It's all about enhancing your productivity and it's bringing it up into the sky.”

Those interested in renting, purchasing, producing, or licensing a SkyPodz unit are encouraged to reach out to Hardin directly. For more information, contact Mike Hardin at mike.hardin@skypodz.com.

About SkyPodz

SkyPodz is the brainchild of Mike Hardin, a member of the American Society of Concrete Contractors, past Chairman of the Board of the Associated Builders and Contractors of Georgia, and President of Harcon Inc. Hardin has provided productivity seminars to over 200 contractors, universities, lean construction organizations, and has been a featured speaker on productivity and creativity. Harcon Inc. is a structural concrete formwork subcontractor of 33 years specializing in commercial and industrial projects of all sizes headquartered in Buford, Ga., with offices in Nashville, New Orleans, Birmingham, and Greensboro, N.C.
