CAPABILITIES STATEMENT

technaLINK

# WE SPECIALIZE

Keeping up with today's relentless pace of change demands the right combination of leading-edge technologies and innovative approaches. Technalink brings both to bear with future-focused, human-centered solutions tailored to your mission and goals.

We help public and private-sector organizations navigate complex changes, leverage technology as a competitive asset, and anticipate evolving needs, threats, and opportunities.

Drawing from over two decades of experience, we support a wide range of organizational objectives.

**We specialize in building continuous integration (CI)/continuous delivery (CD) solutions that optimize security and privacy with continuous protections and compliance management.**

Our portfolio of enterprise technology solutions spans all phases of the digital modernization lifecycle, from design through delivery, including legacy system upgrades and wholesale replacements.

We guide you through the digital transformation process to vastly improve how you collect, use, and secure data, collaborate across teams, and provide stakeholder value through intuitive user experiences.

CI/CD

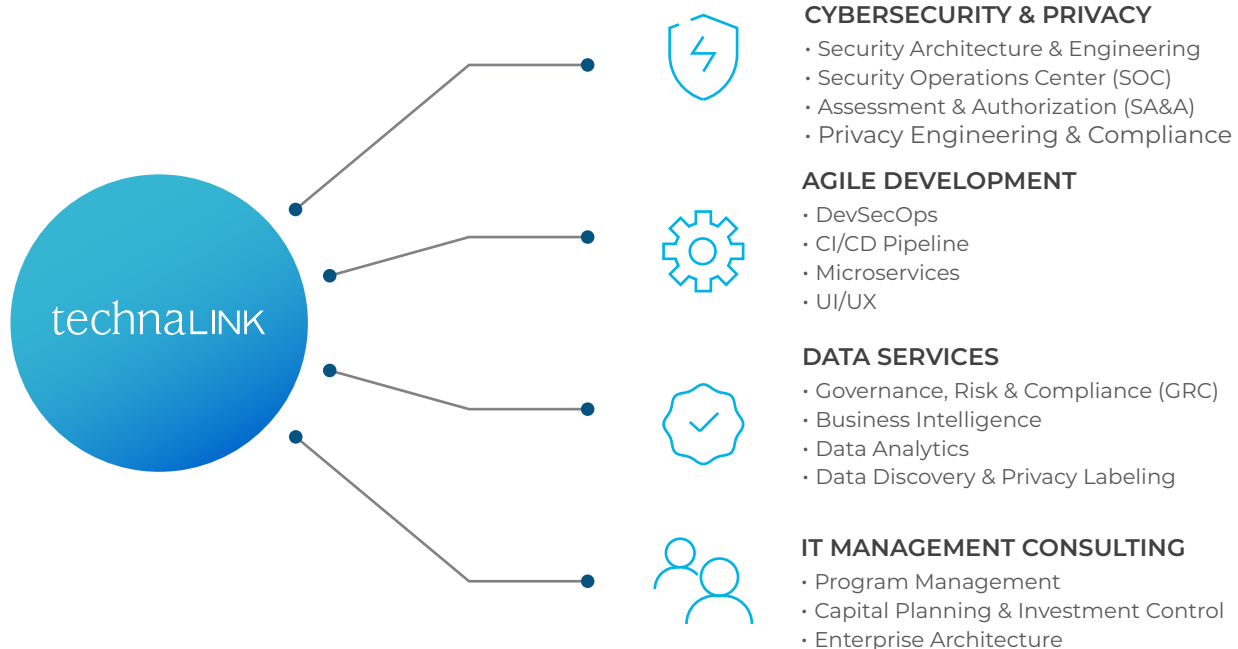

Optimized  
Security & Privacy

Compliance  
Management

IT Management &  
Consulting

## CYBERSECURITY & **PRIVACY**

Technalink examines system protection gaps and mitigates risks to stay ahead of relevant changing threat factors that can leave organizations vulnerable to attacks. Our security and privacy experts offer a holistic set of practices to meet your current needs.

## AGILE **DEVELOPMENT**

Our software teams led by Certified SAFe 5 Program Consultants (SPCs) guide clients through agile transformation efforts that are flexible and responsive to business needs. We offer a full suite of services to plan, design, build, implement and maintain services.

## DATA **SERVICES**

TechnaLink uncovers, analyzes, and visualizes multiple types of data sources to improve context value, enhance data governance, and reduce data management costs to meet business, architecture, and privacy needs.

## IT MANAGEMENT & **CONSULTING**

Technalink's proactive strategy and expert analysis to foster a stronger understanding of requirements and business goals leads to progressive, modern solutions and successful project delivery.
