RF Technologies is Featured on Milwaukee Business Journal's "Milwaukee Area-Based Veteran-Owned Business" List for Third Year in a Row

RFT is pleased to announce, for Veterans Day, that the company is featured as the second largest "Milwaukee Area-Based Veteran-Owned Business" in the 10th issue of the 40th volume of the Milwaukee Business Journal.

BROOKFIELD, WI (November 11, 2022) – RF Technologies® (RFT™) is pleased to be featured on the "Milwaukee Area-Based Veteran-Owned Business" list for the third year running (www.rft.com). Since 1987, RFT has remained a leading provider of innovative and cost-effective healthcare solutions to the hospital, senior living, hospitality, and educational markets.

Founded by Army veteran and CEO, Glen Jonas, RFT is headquartered in Brookfield, Wisconsin and has been committed to keeping people safe since 1987. Glen served in the US Army from 1953-1955 in the Combat Engineering Battalion. He was based near Heidelberg, Germany and describes his service as "the greatest two years of my life." In the years since then, Glen's passion for helping and protecting people has grown into a country-wide safety and security business.

Upon returning to civilian life, Glen began his career at various manufacturing companies. After that, Jonas spent 15 years in consulting, during which time he gained significant exposure to the hospital and senior living industries. At the time, Jonas was intrigued to learn that despite the rapidly expanding senior care market, there were few wander management solutions available. His revelations formed the idea for Code Alert, RFT's first product.

Since then, RFT has grown to offer a wide array of safety and security products and solutions. Currently RFT has 122 employees, and their commitment is steadfast on safeguarding our children, empowering our elders, and protecting our communities, together. As an innovative market leader, RFT is planning a strategy around sustainable growth and solution differentiation. The company continues to expand staff and provide professional development opportunities to align career growth for their employees, and to business initiatives. "Our employees are the heart of what makes RF Technologies capable of providing safety solutions to the world around us" Glen shares proudly.

Beyond company growth and development, RFT focuses on providing safety and is driven to be a collaborative partner that meets each customer's needs and reduces their liabilities. Their team is comprised of experts with a pro-active approach to safety who leverage their industry knowledge and real-life experience to design custom-configured solutions. Unique in their field, RFT is a single-source provider for everything from quotation, to install, service, and education. A nationwide network of factory-trained technicians and US-based 24/7/365 phone tech support ensures that each RFT customer is fully supported.

For questions or inquiries, please contact the RFT marketing department at marcomm@rft.com.
