RF Technologies® introduces Safe Place Asset Management

RFT's SAFE PLACE® Asset Management solution helps maintain and locate medical equipment while improving asset utilization, supporting staff efficiency, and reducing costs due to lost or stolen equipment.

BRBROOKFIELD, WI (December 5, 2022) – RF Technologies (RFT™) today launched Asset Locating, a tagging system that makes it easy to locate and schedule maintenance for mobile medical equipment. Safe Place Asset Management system integrates with other existing hospital solutions, like infant security and staff protection, through Safe Place Enterprise software (<https://www.rft.com/asset-management/>).

RFT, a leading provider of hospital safety solutions and services, is pleased to announce the addition of Safe Place Asset Locating. The asset management system is part of an advanced hospital safety, security and maintenance solutions suite offered from RFT. The asset solution provides a real-time map view of tagged assets that can be exported, as a list, for easy locating and identification. Further, the asset management solution offers maintenance scheduling through the Safe Place Enterprise platform.

Safe Place Asset Management, from RFT, helps locate and maintain mobile medical equipment with ease. Implementing the asset management system results in cost savings, improved patient care, and better inventory management. With proper tagging, all pieces of equipment can be located and maintained on a set schedule. Facilities with asset solution in place experience improved equipment workflows, supported by a real-time location system, with easy-to-use software that provides real-time maps, lists, reports, and alerts. **Facilities interested in learning more about Safe Place Asset Management are invited to request a free demonstration at www.rft.com/Demo.**

Founded in 1987, RFT is a leading provider of innovative and cost-effective healthcare solutions to the senior living market. With the goal of providing seniors with the highest level of care possible, RFT has partnered with hundreds of facilities across the United States to improve the overall quality of life for thousands of seniors.
