## 1. Product Introduction

At [SweetNight](https://www.sweetnight.com), we made it our mission to help sleepers enjoy a good night's rest, through our range of quality innovative products. Our newest solution, *The Eye Tech Mask*, offers all that and much more.

Most people suffer from eye fatigue and soreness following exposure to a wide range of stimuli, pollution, and especially digital screens.

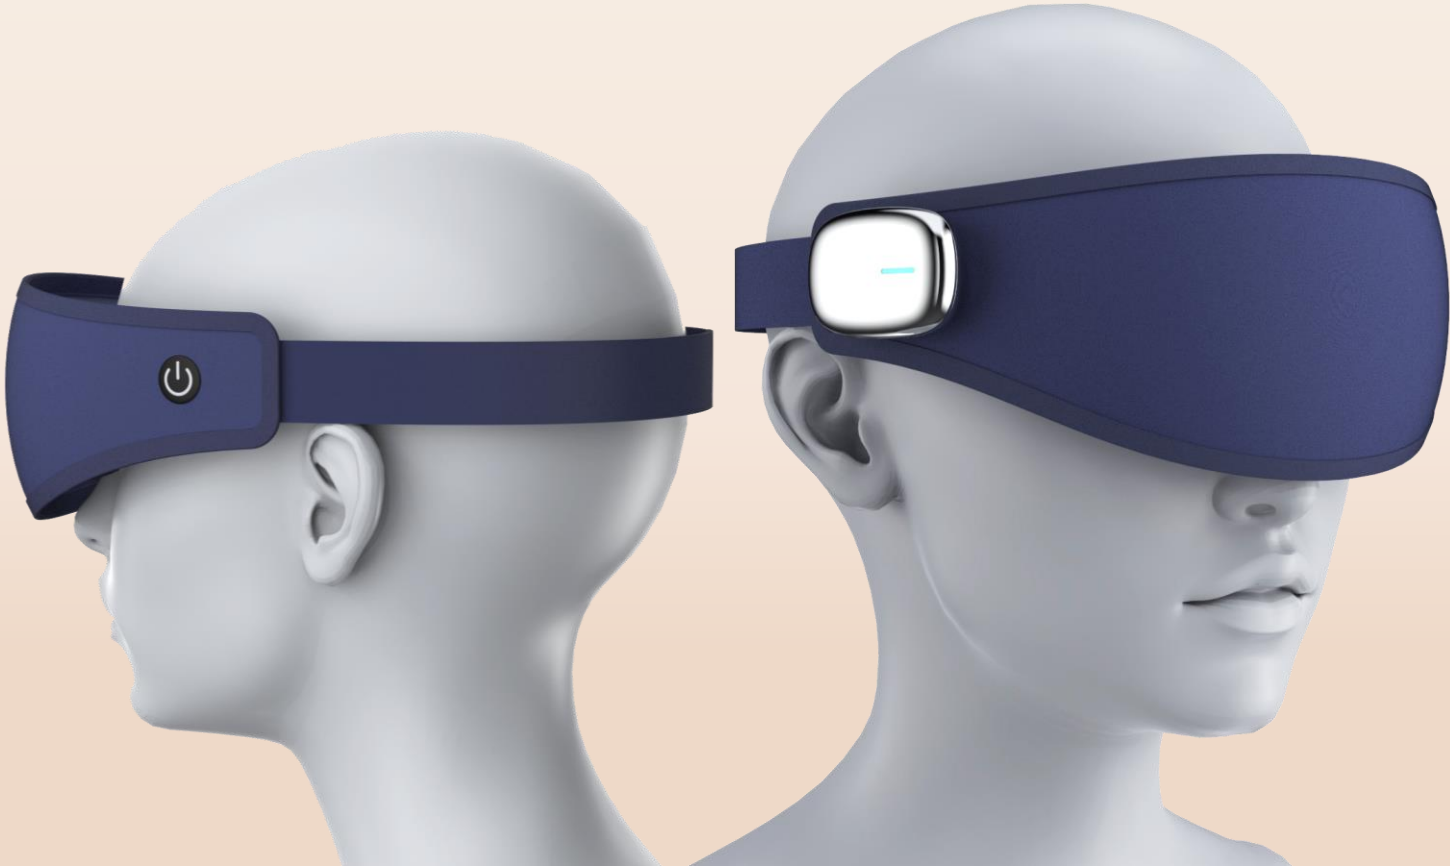

*The Eye Tech Mask* is a mobile eye massager developed precisely to relieve such symptoms. It provides a gentle vibration massage with built-in warm compress features to relax and provide circulation in the eye area. You can even relieve swollen eyes simply by using our external inlay gel pocket for cold compress capabilities.

Its modern, compact, and stylish design, makes it easy to use anytime and anywhere: on the plane, during lunch breaks at the office, for afternoon naps, and for deep sleep throughout the night.

## 2. Product Features

### Eye Fatigue Relief for Better Sleep

*With Adjustable Warm or Cold Compress*

Unlike conventional eye massagers that are heavy and have a hard and bulky profile, *our Eye Tech Mask* uses an innovative combination of flexible fabric and foam to adjust to the wearer's facial contour and fit perfectly, fully blocking light from all sources.

The built-in warm compress can be activated with the touch of a button, whereas the cold compress gel pocket can be fitted within the mask to soothe swollen eyes. They will feel like a godsend on cold winter nights and hot summer days, relaxing tired eyes.

## 2. Product Features

### Warm Compress

The eye mask has a built-in heating element that can be switched on to safely warm the area around the wearer's eyes up to 60°C (113°F). The temperature is perfect to improve eye circulation and induce sleep.

### Eye Massage

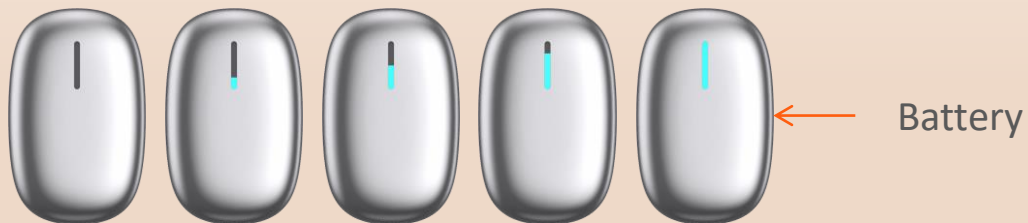

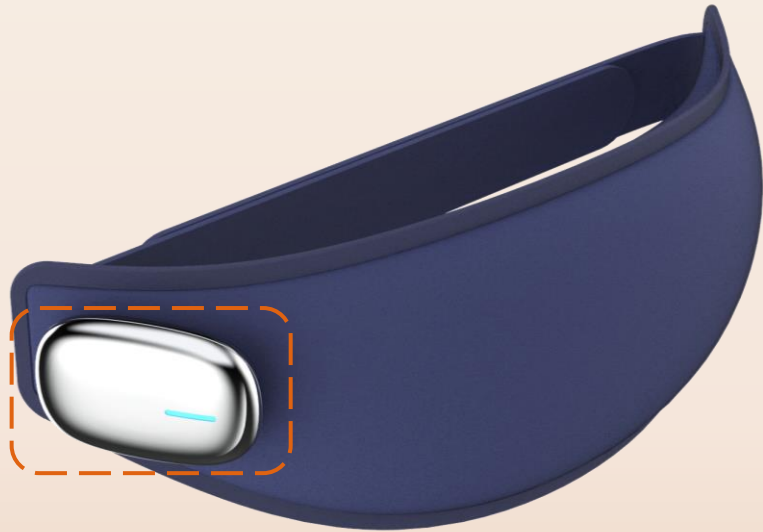

Our Eye Tech Mask uses a small motor which generates 7,000 soft vibrations per minute to massage the wearer's eye region, relieve fatigue and stress to encourage a state of relaxation and well being.

### Ice Compress

Nothing eases inflammation, soreness, dark circles, and irritation better than a cold compress. Our mask offers that too. The cold compress inlay gel pocket can be fitted within the mask to soothe the eyes.

## 2. Product Features

### Portable Battery And Mobile Use

*Comes with USB 2.0 Charge Cable for the battery and a direct plug power cable*

The Eye Tech Mask is powered by a detachable battery that can be recharged with the USB cable. It only needs 40 minutes for a full recharge, which supports 36 minutes of use.

At home or on the go, for a few minutes of relaxation or throughout the night, our mask can be worn anytime, anywhere, by anyone. The battery level indicator light makes it easy to keep track of the time left and to plan a recharge.

To further improve user experience, we also offer another magnetic USB power cable for connecting the eye tech mask to an adapter (not included) or laptop when the battery is running low and recharging it is not an option.
