CMODX

Shark X

Looking to change any pre-conceived ideas about high-end desktop gaming PC and striving for the most unique and innovative products, the CMODX proudly presents the Shark X.

Based on the "Leviathan" Mod created by Inony at the Coolermaster Case Mod World Series. Shark X is a thoroughly remastered and re-engineered high-end gaming PC that can accommodate the latest top-of-the-line components.

On top of scoring the coolest desktop out there, Shark X also contributes to saving the environment and part of the profits are donated to charity organization to protect the seas and its inhabitants.

FEATURES

Unique Design
Shark X is a system that provides an impressive unique alternative to traditional PC systems. Shark X will stand out and can be the ultimate trophy or conversation piece for people looking for a unique setup that stands head and fins above the rest.

Top of the line Specs
Shark X is designed to accommodate top-of-the-line graphics and has been engineered to support a 120mm AIO cooler for the CPU to keep the shark in its elements and temps as remarkable as its unique design.

Easy Upgradable
Despite its complex and unique look, Shark X is designed to be easily and fully upgraded o to make sure you are never running behind the newest and most demanding game titles.

ARGB
Shark X comes with ARGB from its tail to its head to allow users to customize further this unique system. The fully-lit back fin also serves as a Wifi Antenna bringing additional functionalities without affecting the design.

Gaming Beast
Shark X will easily swim through the most demanding games and bite through the heaviest of workload.

Shark X comes equipped with up to a GeForce RTX™ 4090graphics card to deliver the ultra-performance that gamers crave. They are built with enhanced RT Cores and Tensor Cores, new streaming multiprocessors and superfast G6X memory for an amazing gaming experience.

Whether you are team blue or team red, we've got what you need with the latest generations of Intel and AMD CPUs optimized for maximum gaming performance. With up to an Intel Core i9-12900k or an AMD Ryzen 9 5950x, don't be afraid to run your games at max settings and push content creation to new heights.
