

**DURABLE &
CORROSION
RESISTANT**

HEX NUT BLANKS

MARINE GRADE 316 STAINLESS

**HIGH-QUALITY
STAINLESS STEEL**

**SIZE RANGE:
5/8" TO 1-1/2"
(M16 TO M39)**

**GREAT FOR MARINE &
INDUSTRIAL APPLICATIONS**

**UNIVERSAL DESIGN CAN
BE LH OR RH THREADED
TO UNC, UNF OR METRIC**

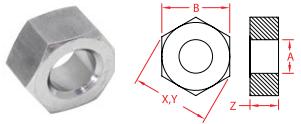

Suncor Stainless® NEW Hex Nut Blanks

Hex nuts are the most common nuts available. They are used in conjunction with bolts, machine screws, swage studs, threaded rods, turnbuckles and many other threaded components that need to be secured into place using a nut. There are many options available for users that require smaller sized hex nuts. As the required hex nut size increases, the availability

of these larger sized hex nuts decreases. Especially when you are looking for a left-hand version. Suncor has developed a solution for this problem. These are unthreaded blanks that can be custom threaded to meet your need. Suncor offers threading services, but users can also choose to buy them as blanks and thread them on demand.

HEX NUT BLANKS 316 STAINLESS STEEL

ITEM	A (id)	B (hex)	UNC THREAD (drill & tap to)	UNF THREAD (drill & tap to)	METRIC THREAD (drill & tap to)	X (height)	Y (length)	Z (width)	WT (lb)
