GEBERIT IN-WALL TOILET SYSTEMS

MODERN MEETS MODULAR

DESIGN
MEETS
FUNCTION

DESIGNED TO **SAVE YOU MONEY**

Geberit In-Wall Toilet Systems have been installed over 80 million times worldwide over the last 50 years. The quality and savings are legendary. Plus, we stand behind every unit we sell with the longest warranty and best technical support in the industry.

Unlike floor-mounted toilets, putting the toilet tank in the wall permits above-the-floor plumbing, and that means:

MANUFACTURING EFFICIENCY

- Fewer floor penetrations and less space required in the floor and ceiling
- Flexible waste stack locations
- Seamless integration into wall panel assembly construction line
- Cost savings on piping, plumbing fittings, fire-stopping and other materials

OPERATIONAL EFFICIENCY

- More space-efficient modules and pods for simpler transport and lower transport costs
- Labor savings at the job site, since the toilet can be pre-installed in the factory

GREENER

Geberit believes in the green mission of modular construction. Our in-wall systems save thousands of gallons of water each year compared to a standard toilet. Our modular construction helps you generate much less waste on site.

DIFFERENT IS BETTER

The Geberit In-Wall Toilet System gives you more options and flexibility in design than any standard toilet system.

FLEXIBILITY

- Locate waste fixtures practically anywhere in the bathroom
- Systems for washbasins, urinals, and bidets are also available, for a completely integrated installation
- Fixture height is fully adjustable to meet design and comfort requirements, including accessible and ADA bathrooms

AESTHETICS

- Hide the unsightly toilet tank inside the wall, where it belongs
- Above the floor plumbing allows higher ceilings
- Install “floating” fixtures for a modern, spacious look
- Geberit offers the widest available selection of flush plate, in-wall carrier, and toilet bowl combinations

GAIN SPACE

- Saves 6 to 9 inches of floor space
- Works ideally in smaller rooms
- Improves user comfort and accessibility

EASY TO CLEAN

- Clean lines mean no hoses, hooks, nooks and crannies to clean
- No fixture on the floor means you can clean the entire floor with a mop
- Easy cleaning means improved hygiene
