

For Immediate Release

The Besen Group Offers Complimentary Private 5G Network TCO Analysis for Enterprises

Washington, D.C., May 15, 2023 (PRWEB) – The Besen Group, an international mobile data industry management consulting practice headquartered in the Washington DC area, with representatives in Paris and Tokyo, offers complimentary private 5G network TCO analysis for enterprises globally.

“With our 5G Spectrum TCO Tool for Private 5G Networks, we can calculate the total cost of any indoor or outdoor private 5G network in less than 10 minutes,” said Alex Besen, Founder and CEO of The Besen Group LLC. “Our TCO analysis will help enterprises to have a solid understanding of their total cost of their private 5G networks during their negotiations with their vendors, system integrators and hyperscalers.”

For the private 5G network TCO analysis, The Besen Group will schedule one hour telephone consultation with each enterprise in order to collect basic market size parameters including estimated bandwidth consumption for their private network use cases.

Upon the completion of the telephone consultation, The Besen Group will provide a complimentary TCO analysis report in PDF format to each enterprise.

The report will include: Market Size, Capex Statement, Opex Statement, TCO Summary and Summary Graphs. Enterprises will also have the opportunity to license 5G Spectrum TCO Tool for Private 5G Networks and do their own TCO analysis based on different private network deployment scenarios.

The Besen Group’s Tool Brochure contains the following business case tools and TCO tools:

- [5G Spectrum TCO Tool for Private 5G Networks](#)
- [Open RAN TCO Tool for Private 5G Networks](#)
- [CBRS TCO Tool for Private 5G Networks](#)
- [CBRS Business Case Tool for Private 5G Networks](#)
- [TCO Comparison Tool: CBRS Neutral Host Network vs DAS](#)
- [TCO Comparison Tool: CBRS Private 5G vs Wi-Fi 6](#)
- [TCO Comparison Tool: CBRS Private LTE vs Wi-Fi 6](#)
- [CBRS TCO Tool for Private LTE Networks](#)
- [CBRS TCO Tool for Neutral Host Networks](#)
- [CBRS Business Case Tool for Private LTE Networks](#)
- [CBRS Business Case Tool for Neutral Host Networks](#)
- [Small Cells TCO Tool](#)

The Besen Group offers each tool on a corporate license basis. The license fee includes one hour telephone consultation with the senior analyst to explain the methodology, assumptions and formulas.

The Besen Group can also develop customized business case tools or total cost of ownership tools based on its client requirements and use cases. For any questions or license information, please send an email with contact details including name, title, company name, phone number to tool@thebesengroup.com.
