

# Mouth Guards

Play it safe with the right equipment!

## 3 types of mouth guards

### Stock mouth guards

Pre-formed and may offer a bulky fit.

### Custom-fitted mouth guards

Made by a dentist.

### Boil-and-bite mouth guards

Made by softening in boiling water and placed in the mouth to shape.

## Prevention is the best policy

You don't have to play at the professional level to sustain a **serious head injury**.

**100 percent** of athletes in contact or collision sports should wear a mouth guard.

## Did you know?

**60x**

Athletes are **60 times** more likely to suffer harm to their teeth if they're **not** wearing a mouth guard.

**11%–18%**

of sports injuries are related to the **face**.

**3%–39%**

of all dental injuries are **sports-related**.

**2x**

Males are **2 times** more likely to experience a **facial sports injury** than females, most commonly injuring the **two front teeth**.

**\$500 million** is spent replacing and repairing the more than **5 million teeth** injured or knocked out every year.

**67%**

of parents admit their child **doesn't** wear a **mouth guard** during organized sports.

## Mouth guards should be

### Fitted

so it does not misalign the jaw and throw off the bite

### Lightweight

### Strong

### Easy to clean

### The proper size

to cover the upper and/or lower teeth and gums
