

Cooler Master's Hyper 622 Halo Provides Double the Cooling

A New Dual Tower Design Keeps PCs Twice as Cool

Taipei, Taiwan - Cooler Master, a global frontrunner in cutting-edge cooling technologies, today announced the Hyper 622 Halo, a new entry in the longstanding Hyper Series that propels Cooler Master's innovative and high-performance technology to new heights.

"I am thrilled to introduce the Hyper 622 Halo, a true testament to Cooler Master's commitment to innovation and uncompromising quality," said Jimmy Sha, CEO of Cooler Master. "This groundbreaking dual tower design not only doubles the cooling power, but also exemplifies our mission to empower enthusiasts and gamers with the ultimate performance and customization options."

With recent advances in CPU technologies demanding more effective cooling, Cooler Master's Hyper 622 Halo is the perfect solution. This dual tower version of the Hyper series features a total of 6 heatpipes for optimal heat transfer. It also doubles the cooling power over previous versions in the series, and the low-profile heatpipe design ensures compatibility with a wide range of case requirements. See the full list of the Hyper 622 Halo's new features and improvements below:

1. Automatic ARGB - Intuitive LED detection automatically provides ARGB spectrum lighting or full ARGB customization via a 3-pin header connection.
2. Case compatibility - Low-profile heatpipes optimized at a height of 157mm, accommodate a wide variety of RAM and case configurations.
3. Premium Aluminum Top Cover – Elegantly designed with an aluminum top cover, complete with Cooler Master's iconic logo.
4. Two redesigned Halo² fans – Two pre-installed LED 120mm Halo² fans featuring stunning lighting and improved fan performance.
5. Dual tower heat sink – A dual tower heat sink provides twice the cooling surface area and works in conjunction with the dual fans to deliver superior cooling.
6. 6-heatpipe design – A nickel-plated base with 6 uniform heatpipes provides complete CPU coverage and superior heat transfer efficiency.

Double your PC's cooling power with the Hyper 622 Halo and achieve unprecedented performance!

About Cooler Master:

Established in 1992, Cooler Master is a PC hardware brand with a track record for advancing the industry. From the world's first aluminum PC case to our pioneering thermal technologies, we are committed to breaking technological boundaries and challenging the status quo. Our focus is to create a community for individuals who dare to stand out and embrace their inventive identity. Whether its new builders using their PC as medium for self-expression, or hardcore gamers setting up their battle stations, we revel in being Wired Different. We are a brand aiming to go above and beyond the build-your-own PC experience by creating cool products for awesome people to build with in their own unique way.
