

S O L E A

WHY SOLEA?

Solea® is the number one selling all-tissue laser in dentistry. It's fast, precise, virtually anesthesia-free for any cavity prep, and blood-free and suture-free for most soft tissue surgeries. Patients love the unique experience. Dentists love the practice growth, improved outcomes, and new patient referrals.

Finally a laser you can believe in.
Total satisfaction or 90-day money back guarantee.*

*Please contact Convergent Dental for details

ANESTHESIA-FREE

Solea dentists report performing the vast majority of their hard and soft tissue procedures without anesthesia. Not only are patients more comfortable, but not injecting saves you time and lets you do more work in a single visit.

FAST CUTTING

Solea's unique 9.3 μm wavelength enables significantly faster and quieter cutting than any other hard tissue laser on the market. Solea's speed and reliably anesthesia-free performance mean you and your patients benefit from dramatically reduced chair time.

COMPREHENSIVE SUPPORT

You will receive world-class training and support augmented by online courseware that is available before and after your initial training. You will have access to SoleaDoctors.com, a resource where you can discover capabilities, learn new procedures, and review clinical techniques.

EASY RAMP UP

Solea was designed for everyday dentists. One day of training is all you will need. It has a familiar handpiece, easy-to-navigate touch screen and a variable-speed footpedal, guaranteeing an easy transition.

WORK SMARTER, NOT HARDER

When you perform cavity preps without anesthesia, everything gets done quicker and easier. No calming patients down, injecting them, leaving the operatory while they get numb or reappointing for work in other quadrants. Greet your patient and get started. You will be done faster than either of you expected.

You don't have to refer your patients out for soft tissue surgeries when you can easily perform them yourself. Your patients want to be treated by you, the dentist they know and trust. Solea is virtually blood-free, suture-free and discomfort-free for soft tissue work. You'll get better outcomes than using traditional methods. Happier patients, more procedures, better outcomes. That's a win, win, win.

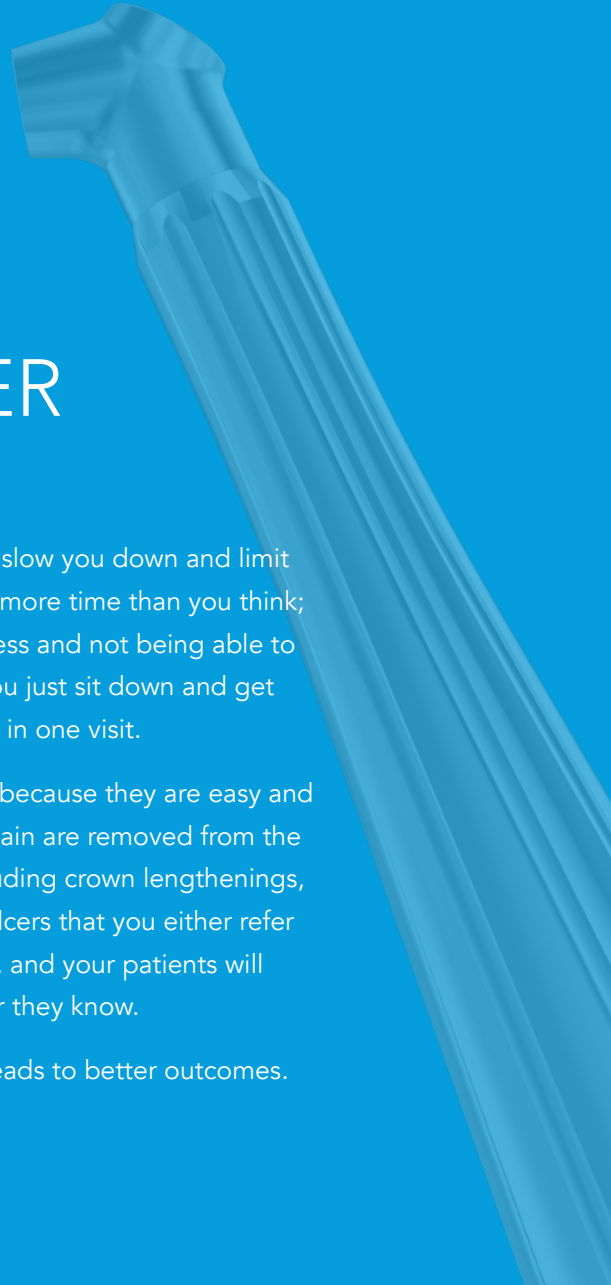

Saving time doing hard tissue work, performing your own soft tissue surgeries and delivering a stress-free patient experience enables dramatic practice growth. Solea takes the stopping and starting out of your day. No bouncing between patients. Stay with each patient until you are done and do it all in less time. The average Solea dentist feels like they are doing less work, but in reality, they perform 4-6 more procedures per day. That is what the number one selling all-tissue laser can bring to your practice and your life—less stress, more revenue.

EXPAND YOUR PROCEDURES, DELIVER BETTER OUTCOMES

Eliminating anesthesia removes obstacles that slow you down and limit what you can do in one visit. Anesthesia takes more time than you think; calming patients, injecting, waiting for numbness and not being able to work in four quadrants. Without the needle, you just sit down and get started, then do all the work the patient needs in one visit.

Solea dentists add new soft tissue procedures because they are easy and quick once injections, bleeding, sutures, and pain are removed from the mix. Higher paying soft tissue procedures including crown lengthenings, frenectomies, gingivectomies, and aphthous ulcers that you either refer out or ignore, are now easily within your reach, and your patients will love getting the procedure done by the doctor they know.

Solea's precision in both hard and soft tissue leads to better outcomes. That's good for you and your patients.

A ZERO-ANXIETY EXPERIENCE

Patients want noise-free, needle-free, drill-free, blood-free, suture-free experiences. When you take the source of anxiety out of the experience, you get more patients and keep them longer. New patients referrals go up, and attrition goes down. You can market Solea or just let your patients do it for you. Solea patients talk about their experience because it is unique. They tell their friends and you reap the benefits.

WE'VE GOT YOUR BACK

When you bring Solea into your practice, our world-class training and support team comes with it. Solea is simple to use. You will be fully capable after a comprehensive one-day training session conducted by a Solea trainer-dentist. You will also have access to our vast library of online resources including training materials, case studies, discussion boards and more. Whether you want to master a new procedure or bring a new assistant up to speed on set-up and maintenance, everything you need is online on SoleaDoctors.com. You will become part of the Solea community online and in person at our annual user group meeting.

Solea is known for its reliability but if you ever have a problem, we've got you covered. Solea is Wi-Fi and cellular enabled for diagnosing and fixing problems as well as for automating delivery of performance-enhancing updates.

At Convergent Dental, we are committed to you getting the most out of your Solea, and we bring the resources you need to be successful.
