**Aqutas Solutions makes upgrades for nationally recognized healthcare organization**  
*New asset management solution supports operations of cancer treatment and research facilities*

**May 3, 2023**

ROSWELL, GA – Aqutas Solutions, a leading provider of Enterprise Asset Management (EAM) and IoT solutions that optimize asset-intensive industries, recently announced the completion of their EAM consolidation project with a globally-recognized healthcare provider.

Through the combined effort of leaders involved in this EAM implementation, healthcare leadership will gain greater visibility into trends and risks, improve reporting around assets and operations, and the capability to quickly reallocate labor. This enhanced information available in a single EAM solution with a disconnected mobile solution can help promote long-term cost savings and a more efficient workforce.

"Our team appreciates the opportunity to support an organization that helps so many in their time of need," said Jeff Brown, CEO of Aqutas Solutions. "The new asset management solution will simplify managing facility infrastructure and maintenance activities for the organization's hospitals and research facilities. Renowned healthcare facilities require operational excellence, and the solution that's now in place will support staff in efforts to maintain an elevated standard of care in compliance with all regulatory agency requirements."

### **About Aqutas Solutions**

Aqutas brings 20+ years of EAM experience and a proven record of success across many industries. As an expert in implementing and supporting Maximo, Aqutas is uniquely positioned as a strong resource for clients ready to rethink their operations and facility maintenance strategy. The company's Connected Maintenance portfolio is comprised of Maximo, IoT and Augmented Reality technologies that advance current maintenance practices while leveraging existing systems.

Based in Atlanta, GA, Aqutas' leadership team and management consultants have industry leading enterprise asset management experience helping clients leverage their EAM system to optimize performance and improve productivity and service levels across the entire spectrum of their organization.
