

BE DIFFERENT

When one thinks about high-end desktop PC, what comes to mind are glass panels, right-angle aluminum frame cases and tons of RGBs. To redesign this stereotype, Cooler Master's team presents a luxurious lifestyle take, with the first line-up introducing the Sneaker X.

Design from the ground up by JMDF, which was first exhibited at the "Case Mod World Series 2020". Aesthetically the design is taken from the iconic sneaker, perfect for those sneaker heads to have an additional collection that can function as their PC.

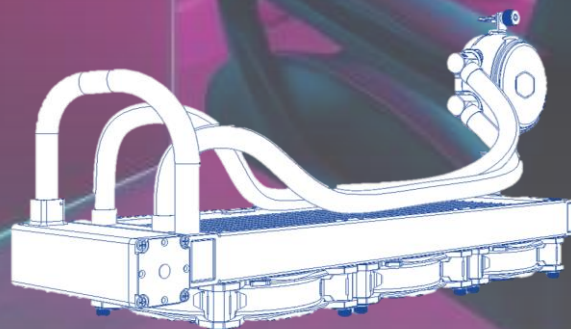

DISTINCTIVE OUTLOOK

OUTSTANDING PERFORMANCE

Despite its unusual form, Sneaker X is designed to accommodate standard components, such as ITX form factor motherboards, SFX PSUs, and 3-slot GPUs.

It has been engineered to support a unique water-cooling system to keep the system's temps as chill as its unique design.

HIGH-END COMPONENTS

MASTERFAN MF120 HALO

- airflow 47.2 CFM \pm 10%
- noise level 6 – 30 dBA
