ARCH Cutting Tools Acquires Cape Coral, Florida based Company, VR Wesson

Bloomfield Hills, Michigan — ARCH Global Holdings LLC Company (ARCH) announced the acquisition of VR Wesson, a manufacturer of standard and special inserts, tool holders, and milling cutters located in Cape Coral, Florida. The company will join ARCH Cutting Tools, a division of ARCH and industry-leading, American manufacturer of solid round and indexable metal removal tooling.

ARCH Cutting Tools is headquartered in Bloomfield Hills, Michigan, and serves the medical, aerospace, defense, automotive, energy, agriculture, and general industrial markets. ARCH Cutting Tools has facilities across the Eastern United States and is dedicated to engineering high-performance standard and custom tools that increase efficiencies for end-users. VR Wesson will be consolidated into ARCH Cutting Tools – Orchard Park and will expand the company’s existing insert offering via ARCH Specials, as well as our North American Carbide and Ultra-Dex legacy brands.

“ARCH Cutting Tools is proud to announce the acquisition of VR Wesson, whose advanced manufacturing technologies and key accounts will be consolidated into our Orchard Park, New York facility,” said Robert Gralke, President of ARCH Cutting Tools – Orchard Park. “We are particularly excited to bring laser PCD finishing capabilities under our roof, which will increase our team’s efficiencies and expand our product offering to key industries, including automotive and medical.”

About ARCH Cutting Tools

ARCH® Cutting Tools Corp., an ARCH Global Holdings LLC Company (ARCH) based in metro Detroit, is an industry-leading, American manufacturer of solid round and indexable metal removal tooling. As a mid-sized, full-service company, ARCH Cutting Tools leverages the collective capabilities of its facilities to engineer a wide array of high-performance standard and custom tooling. ARCH Cutting Tools combines the expertise of leading American manufacturing professionals and expanding technologies to serve the medical, aerospace, defense, automotive, energy, agriculture, and general industrial markets.
