KitoTech Medical Inc. Announces Publication of Clinical Results of Laceration Repair Study in The Emergency Medical Journal

SEATTLE, WA (August 2nd, 2023) – KitoTech Medical announces the results of a clinical study using microMend® PRO to close lacerations reported in the leading publication, Emergency Medical Journal. The study was conducted at Lifespan Health System that treats large numbers of lacerations in their Emergency Rooms. It demonstrated outstanding results in using microMend PRO to treat lacerations at Brown University and another Lifespan hospital.

In the clinical study, lacerations in 31 patients were closed with microMend PRO. Ninety percent or more of healthcare providers reported good to excellent outcomes in all measured parameters including ease of use, speed, and overall assessment. The product was reported to be virtually painless by patients. Cosmetic results were measured in the study and documented to be superior to results using other wound closure products that have been reported in the literature.

“We thank the team of physicians and other healthcare providers who conducted the study. The publication of the results of the study in a leading emergency medicine journal validates the effectiveness of microMend PRO in repairing lacerations. The high ratings reported for every measurement in the study are consistent with the results of physicians throughout the US who are using the products to close a wide range of wounds.” said Ron Berenson, MD, President and CEO.

About microMend® PRO

microMend PRO products comprise an array of miniature staples (Microstaples) attached to an adhesive backing that combines the holding strength of a suture with the simplicity of applying a bandage. It provides an easy-to use, time-saving, and cost-effective option for closing wounds. microMend PRO includes a broad range of products to close nearly all wounds including lacerations, skin tears, surgical incisions, and port sites. microMend PRO is being sold by Corza Medical.

About KitoTech Medical

KitoTech Medical is a medical device company that is using its patented Microstaple Technology to develop and commercialize products for wound closure. microMend® and microMend® PRO are available on the consumer and medical markets, respectively. Additional information about the company and its products can be found online at www.micromendskinclosure.com.
