

Life Sciences Capabilities

Technology Optimized. Compliance Simplified.

How fast can a life sciences organization move with innovative information technology at the core of every action? What if routine, regulated tasks across departments and continents were automated? What if business insights soared from carefully crafted algorithms that fueled confident business decisions? What if the scientific discovery was made safer and faster without fearing an imminent FDA audit?

At USDM Life Sciences, our purpose is to bring clarity and action to the interplay of technology and regulations to help biotech, pharma, and medical device companies deliver trailblazing outcomes. We help our customers utilize cutting-edge technology to increase their speed to market while ensuring continuous compliance and patient safety.

What We Do

Life sciences companies are challenged because the very core of their work is about human existence – improving and extending life itself. Regulators have massive civic responsibilities, but the government regulations slow the advancement of life sciences and medicine. We create a symbiotic relationship between technology and compliance to empower your best work.

LIFE SCIENCES EXPERTISE	COMPLIANCE SIMPLIFIED	GXP TECHNOLOGIES

From strategy and execution to quality management and quality assurance, USDM has solutions that connect technology, people, and processes throughout your organization. We offer a range of delivery models from managed services to strategic consulting to staff augmentation--whatever it takes to meet your business needs.

USDM can help you implement a GxP-compliant framework for every layer of your cloud tech stack and maintain your ongoing validation so you can focus on innovating. We have two propriety solutions for continuous compliance and process automation.

USDM Cloud Assurance™	ProcessX™
<p>USDM's Cloud Assurance is a subscription service that delivers end-to-end GxP compliance, including rapid implementation, validation, validation maintenance, and an annual vendor audit. Designed for SaaS, PaaS, or IaaS systems, USDM can enable your continuously compliant tech stack.</p>	<p>ProcessX is an intelligent, fully validated, GxP process automation platform built on ServiceNow for all those processes that still have you pushing paper. Imagine simplifying, scaling, and maintaining regulatory compliance of all your regulated, fragmented processes in one platform.</p>

Who We Work With

Google, Microsoft, Amazon, Oracle, and every other top technology company trust USDM to ensure their technology is adopted effectively, powerfully, and in compliance. Thousands of life science companies choose USDM to bring the future of work into the present. We make digital transformation in highly regulated areas possible, even simple, and everyone wins – especially the patient.
